

QUICK START GUIDE • MFP UI DEVICE LICENSES

The Konica Minolta MarketPlace includes an easy-to-use User Interface Builder tool that allows our customers to create custom user interfaces (UIs) for their MFPs. The MFP UI Device License unlocks the MFP, allowing any custom MFP UIs to run permanently on the MFP. This guide covers how to install MFP UI Device Licenses. For more information on getting started with custom MFP UIs, please see the Custom MFP UIs Quick Start Guide. For more information on other Konica Minolta MarketPlace features, please go to the online help on the MarketPlace website (www.konicaminoltamarketplace.com).

QUICK FACTS

- Creating MFP UIs is FREE for anyone who has a MarketPlace account.
- Any custom MFP UI can be installed as a 15 day DEMO, or licensed permanently on the MFP.
- Only one MFP UI Device License is required per MFP, regardless of the number of custom UIs to be installed.

AT A GLANCE

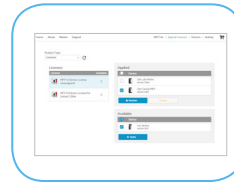

To install an MFP UI Device License, follow these steps:

STEP 1: Login

STEP 2: Purchase License

STEP 3: Install License

STEP 4: Use New UI

1

Log into the MarketPlace

To create a FREE account, [click here](#)

Install the “MFP UI Device License”

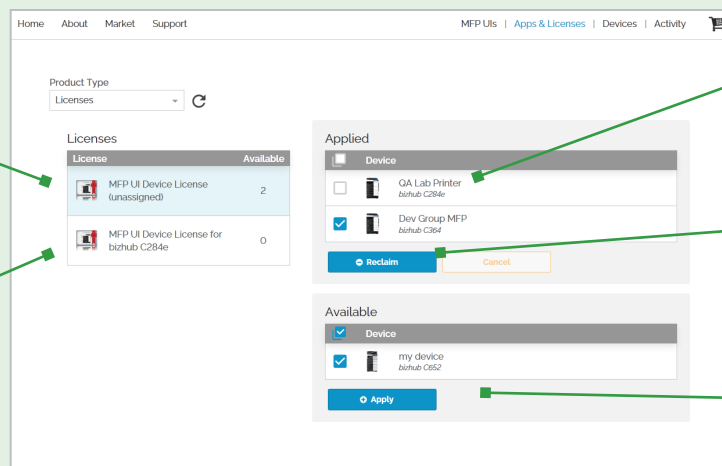

1. Click on the Apps & Licenses link on the top navigation bar.

2. On the License Management window, select the MFP UI Device Licenses option from the drop-down list. You will see the MFP UI Device License(s) that you have purchased, along with the number of licenses currently available for you to install (listed under the Available column).

All licenses that have been purchased but not yet assigned to a device are listed here and labeled as “Unassigned”

Licenses that have already been assigned to a specific MFP model are also listed and displayed with the MFP model name

Devices that have an MFP UI Device License installed on them are listed here

Reclaim button allows you to remove the MFP UI Device License from the MFP.

Devices that can have an MFP UI Device License installed on them are listed here

3. Click on the license under the MFP UI Device Licenses area to select it.
4. In the Devices - Available area, check the box next to the device(s) where you would like to install the license.
5. Select the **Apply** button to put the operation in queue for processing.

About Unassigned/Assigned Licenses

- An MFP UI Device License is “Unassigned” until it is installed on an MFP.
- Once an Unassigned MFP UI Device License is installed, it is locked to the specific MFP model.
- Licenses can only be transferred between same model MFPs.
- To reclaim a license, check the box next to the MFP with the license in the Devices-Installed area; then select the **Reclaim** button.
